

Batch Transfer Manager

Foundation Series

Is your businesses spending countless hours creating new batches of invoices or purchase orders from individual orders? To improve the functionality within Microsoft Dynamics GP, Binary Stream Software Inc. has designed an enhancement solution called the Batch Transfer Manager™ to improve transaction efficiency. The Batch Transfer Manager™ helps businesses increase productivity and efficiency by streamlining the order-to-invoice and order-to-purchase order batch transferring process. By utilizing the Batch Transfer Manager™ enhancement for Microsoft Dynamics GP, businesses can:

- *Improve customer responsiveness*
- *Increase worker productivity*
- *Streamline and integrate accounting functions*
- *Reduce operational costs and timely data-entry*

Efficiency...every step of the way

Binary Stream's Batch Transfer Manager™ enhancement was developed to address the importance of transaction processing efficiency. The functionality of the Batch Transfer Manager™ allows Microsoft Dynamics GP users to easily transfer orders from any batch to a create a new batch of invoices containing the order data. Alternatively, the Batch Transfer Manager™ can create new purchase orders from original orders and both purchase orders and invoices that are created from the original orders can be printed. Binary Stream has built the Batch Transfer Manager™ to help business reduce operational costs, again, demonstrating Binary Stream's focus on maximizing your return on investment with Microsoft Dynamics GP.

Control and Convenience

Instead of selecting orders to transfer from individual transactions, the Batch Transfer Manager™ allows Microsoft Dynamics GP users to easily transfer orders to new batches by simply selecting which orders to transfer. The Batch Transfer Manager™ integrates with the SOP, AR, AP, GL, and POP modules in Microsoft Dynamics GP to provide enhanced flexibility.

Features

- *Transfer existing orders, purchase orders, and invoices into new batches based on specific user criteria*
- *Sort documents by various data fields to transfer the documents that you want*

Our Customers

Currently, a number of companies, mainly in the manufacturing and distribution industries, have requested this solution. However, the Batch Transfer Manager™ is applicable to several industries that are product intensive such as the service and utility industries.

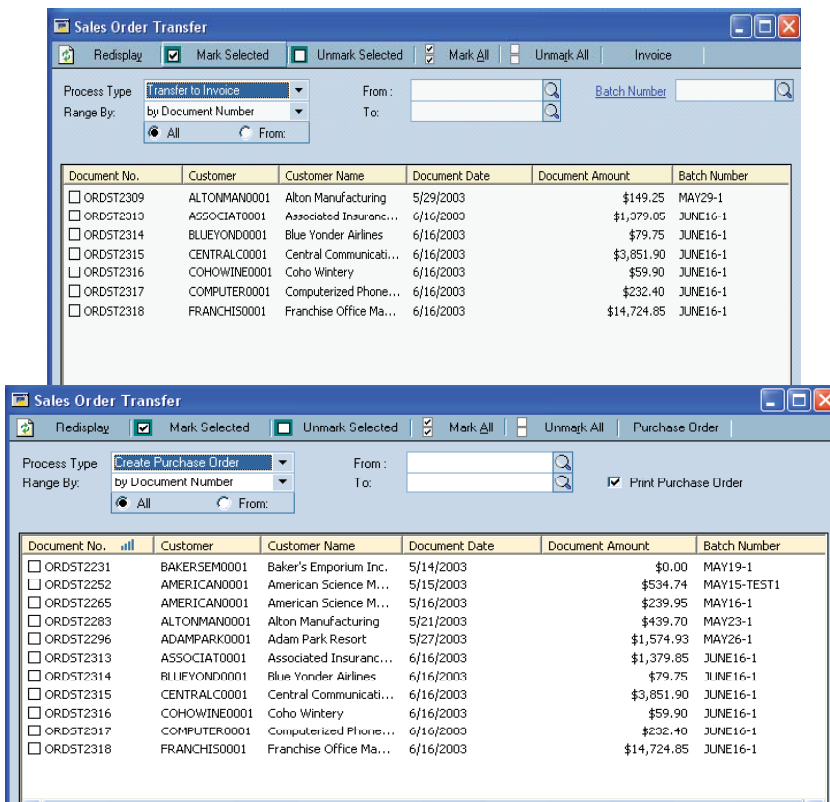

Seamless Integration

Built with the Dexterity™ development tool, the [Batch Transfer Manager™](#) integrates with Microsoft Dynamics GP while maintaining data integrity. The data entry screens are easy-to-use and can be customized to specific needs. Currently, this solution is best suited for telecommunications (ISPs) and utility companies that want to streamline their invoice processing

Batch Transfer Manager

Control which orders to transfer

Benefits

- Reduce transaction processing costs
- Improve customer responsiveness
- Increase productivity and sales turnover
- Streamline invoicing transactions

"After a software customization project for us had gone off the rails in a lengthy bungled manner, with a few computer consulting firms contributing to the wreck, it was Binary Stream Software who finally rescued the project. Their people are a joy to deal with, and we were able to realize the benefits that were promised to us so long ago. We wish we had found them first."

*Ron D. McTaggart C.A. Controller,
Connors Drilling Ltd.*

Support and Customizations

At Binary Stream Software, customer satisfaction and support is our top priority. If you would like to customize this product specific to your business, we would be more than happy to provide you that service. We also provide 100% knowledge transfer to Partners and clients. Over 90% of inquiries are resolved through training and support. Within a three hour response time, questions and problems are resolved by our dedicated technical support team.
