

Making the Right Choice

Are you looking to process EFT transactions within Microsoft Dynamics GP more efficiently with Canadian financial institutions or European banks? Binary Stream has listened to its partners and customers by developing the EFT Manager, a flexible EFT enhancement solution that supports the EFT banking formats for large Canadian banks such as HSBC, Scotiabank, Laurentian Bank, and other banks that use the HSBCnet and CPA 005 standard. For European banks, we support the BACS file format which is primarily used in the UK. Instead of developing your own solution and learning about different EFT formats, Microsoft partners and end-users have come to rely on our established reputation as Microsoft Dynamics GP experts to deliver solutions that bring results. The EFT Manager offers seamless integration to the EFT Payables and Receivables module so you do not have to switch between applications that are separate from Microsoft Dynamics GP.

Control your EFT transactions with ease and bank with more Canadian and European banks.

Features & Benefits

- *Work with More Financial Institutions*
 - Create EFT transactions using the CPA 005 standard, HSBCnet, and BACS file formats
- *Increase AR turnover*
 - Seamless integration with Microsoft Dynamics GP's EFT AP/AR module
- *Reduce paper transactions*
 - Enable more online fund transfers
- *Maximize employee productivity*
 - Reduce e-banking transaction times

Industry Use

Binary Stream focuses on your success by providing solutions that will increase organizational efficiency and effectiveness. The EFT Manager is truly a cross industry solution that can be used by virtually any company that wants EFT capabilities with more Canadian and European banks.

Seamless Integration

Like most of our products, EFT Manager was developed using Dexterity, the native programming language for Microsoft Dynamics GP. This means you are integrated to Microsoft Dynamics GP in the best possible way, keeping data in one central location. Data imports or synchronization is eliminated, user training is minimized, and you can easily create reports on data that is in our product. You won't be able to tell if EFT Manager was a separate product.
