

# Healthcare Materials Management

"Binary Stream's experience in developing customer and industry specific applications on top of Dynamics GP is exemplified by their Materials Management solution for healthcare. As Microsoft continues to develop industry relevant solutions, Binary Stream has proven that they have the expertise to align their development efforts with this industry approach. Microsoft is proud to partner with Binary Stream in healthcare."

Paul E. Smolke, Managing Director  
Healthcare Strategy, Microsoft Business Solutions

## Healthcare Materials Management for Microsoft Dynamics GP

A fully integrated solution for managing inventory levels and optimizing patient care in healthcare organizations.

Materials management is the second most costly element of providing Healthcare services, second only to human resources. This area can have a significant impact on your bottom line. Built on Microsoft Dynamics GP, Healthcare materials management brings you a comprehensive and scalable package to fully manage requisitions, procurement, fulfillment and consumption processes.

**Inventory PAR Levels** controlled by inventory site.

**Contracts** and contract expiration dates are shown for items under contract.

**Three Units of Measure** for every item to simplify purchasing, department issuance and patient consumption.

**Item Maintenance** (sa Fabrikam, Inc. 4/12/2017)

Processing .....

**Handhelds & Bar-Codes** can make inventory work fast and paperless for busy central stores.

**Auto Receiving** allows you to receive items from many POs in one receipt screen.

**Inventory Replenishment** reduced to just a few clicks. The system generates suggested item quantities needed given the available stock on hand. Preview and then confirm with a single click.

**Built-in Materials Workflow** automatically decides if goods will be issued through stores or need to be purchased.

**Integrations to Billing Systems**, best-of-bread requisition products and Point-of-Use systems are also available.

**Manufacturing Part Numbers** are stored for reference whether historical or current.

**Manage Equipment** rented or owned from room-to-room and/or patient-to-patient.
