

The new release of Microsoft Dynamics GP 2010 brings with it several improvements to document delivery processes. While many of these functions are similar to the value provided by Binary Stream's eMailer Manager, there are several differences between the document delivery enhancements. This document is a basic guide to these differentiation points and can help you understand what eMailer Manager offers Microsoft Dynamics GP 2010 users.

Functionality Summary for Microsoft Dynamics GP 2010

Below are the additional features eMailer Manager offers you above and beyond what is provided in Microsoft Dynamics GP.

Additional Documents Managed

- *Send Sales Picking Tickets and Packing Slips*
- *Send Sales Statements*
- *Send Payables EFT Remittances*
- *Send US and Canadian Payroll Remittances*
- *Send Project Accounting Invoices*

Attachments & Reporting

- *Add additional attachments to emails*
- *Integrations with Crystal Reports enable customized reports to be sent from Crystal Reports*
- *SQL Server Reports can be sent*

Transmission Considerations

- *Send documents by various fax applications and by email*

Binary Stream's eMailer Manager still offers Microsoft Dynamics GP users valuable functionality for specific workflows. For users in need of EFT payment notifications being sent by email and users sending payroll remittances in the USA and Canada, this functionality will bring you time saving efficiencies. Additionally, customized reports from Crystal Reports can be sent via this software package.
