

Does your business need to be able to view inventory data from multiple sites at the same time? To improve the inventory functionality within Microsoft Dynamics GP, Binary Stream has developed a useful tool, called the InterCompany Inventory Manager™, to expand the current inventory viewing functions in Microsoft Dynamics GP. Rather than only viewing one site's inventory data at a time, the InterCompany Inventory Manager™ allows businesses to view multiple sites' inventory data for comparison purposes. By utilizing the InterCompany Inventory Manager™ enhancement for Microsoft Dynamics GP, individuals and businesses can benefit by:

- *Streamlining the inventory management process*
- *Reducing operational and administrative costs*
- *Managing inventory more effectively*
- *Increasing inventory reporting flexibility*
- *Maximizing the value delivered to stakeholders*

Efficiency...every step of the way

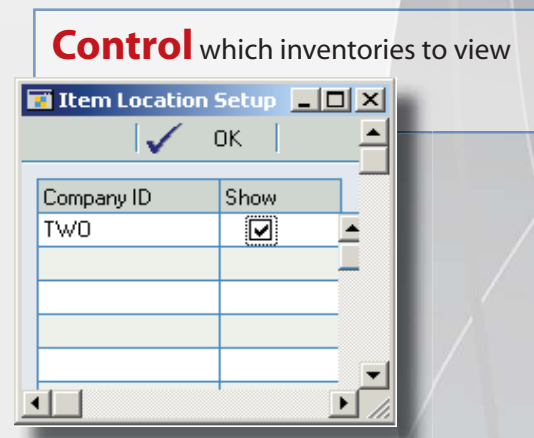

Binary Stream's InterCompany Inventory Manager™ enhancement was developed to address the growing demand for an enhanced inventory reporting function for Microsoft Dynamics GP. The InterCompany Inventory Manager™ enhancement is a simple and smart tool designed to allow Microsoft Dynamics GP users to easily view multiple inventory sites' data. If your business needs to lookup multiple sites' inventory data in Microsoft Dynamics GP, contact Binary Stream to learn more about how the InterCompany Inventory Manager™ can help improve your inventory management functions.

Control and Convenience

Through the use of simple interfaces, the InterCompany Inventory Manager™ allows Microsoft Dynamics GP users to manage which inventories to view by Item Number, Customer Name, or Class ID. The inventory data can also be sorted to meet the user's specific requirements.

Features

- *View multiple sites' inventory data in one window*

Our Customers

Currently, a number of companies, mainly utilizing distribution centers and warehouses have requested this solution. The InterCompany Inventory Manager™ is the perfect solution for business with multiple inventory sites.

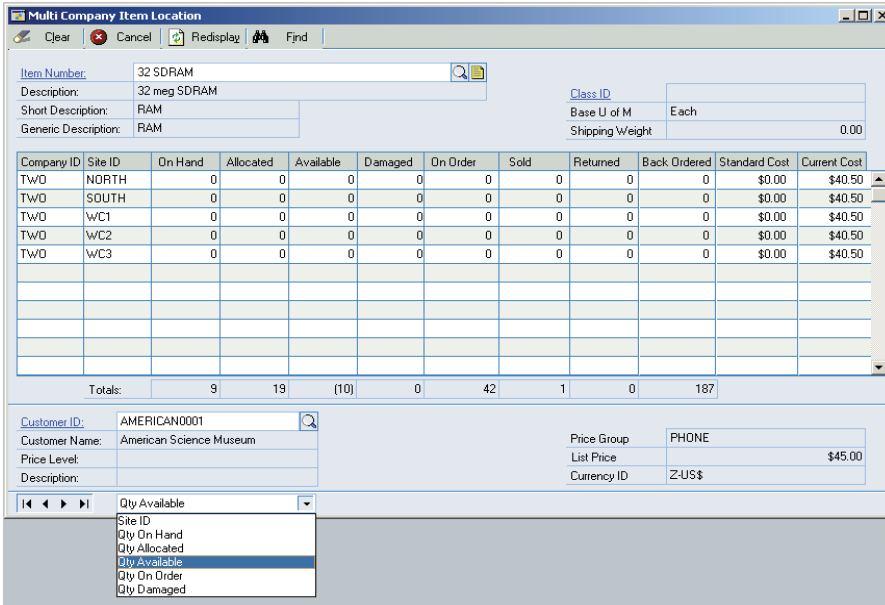

Seamless Integration

Built with the Dexterity™ development tool, the InterCompany Inventory Manager™ integrates with Microsoft Dynamics GP while maintaining data integrity. The data entry screens are easy-to-use and can be customized to specific needs. Currently, this solution is best suited for telecommunications (ISPs) and utility companies that want to streamline their invoice processing

InterCompany Inventory Manager

Foundation Series

Control which inventories to view

Benefits

- Enhance inventory related decision-making
- Maintain optimum inventory levels

"After a software customization project for us had gone off the rails in a lengthy bungled manner, with a few computer consulting firms contributing to the wreck, it was Binary Stream Software who finally rescued the project. Their people are a joy to deal with, and we were able to realize the benefits that were promised to us so long ago. We wish we had found them first."

*Ron D. McTaggart C.A. Controller,
Connors Drilling Ltd.*

Support and Customizations

At Binary Stream Software, customer satisfaction and support is our top priority. If you would like to customize this product specific to your business, we would be more than happy to provide you that service. We also provide 100% knowledge transfer to Partners and clients. Over 90% of inquiries are resolved through training and support. Within a three hour response time, questions and problems are resolved by our dedicated technical support team.
