

Lease/Loans Manager

Manager Series

Manage Your Loans & Leases

Take control of your leasing or loan activities with Binary Stream's Lease/Loans Manager for Microsoft Dynamics GP. By adding a significant amount of functionality to the Scheduled Payments feature within the Receivables Management module, the Lease/Loans Manager helps you manage your leases and loans more effectively and can greatly streamline your AR or leasing & loans departments in their everyday workflows. Additional features have been developed to streamline the lease/loans management process, including the 'Rule of 78' interest computations, amortizations for leases, additional payment frequency options, enhanced payment status reports, customized transaction distributions and the ability to calculate and collect taxes from leasing/loans customers.

By simplifying your lease and loans workflows you can benefit from the increased clarity and visibility of your leases, which in turn will help you better track and manage your accounts receivables. Through improved reporting and inquiries you can get a better idea of where you lease and loan payments stand. The Lease/Loans Manager offers Microsoft Dynamics GP users a more efficient and productive workflow to ensure they are making the most out of their leasing and loan activities.

Seamless Integration

Like most of our products, the Lease/Loans Manager was developed using Dexterity, the native programming language for Microsoft Dynamics GP. This means you are integrated to Microsoft Dynamics GP in the optimal way, keeping data centralized in one location and one system. The need for data imports or data synchronization is eliminated, user training is minimized, and you can easily create reports from data that is captured in our solution.

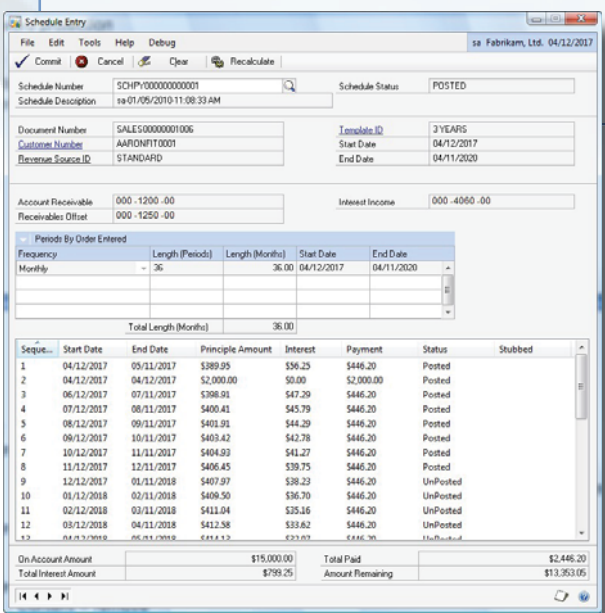

Industry Use

Binary Stream Software focuses on your success by providing solutions that will increase organizational efficiency and effectiveness. The Lease/Loans Manager is a cross-industry or "horizontal" solution that can be applied to virtually any leasing and loans company looking to optimize their leasing and loans operations. With typical end-users in the business of leasing business equipment such as telephones, tools, or trucks, organizations can improve their collection turnover and maximize their interest earned through the use of Lease/Loans Manager.

Features
